03 COMPACT MARKS

04 THE MARK, CLEAR SPACE & MINIMUM SIZE

05 INCORRECT USAGE

06 COLOR PALETTE

07 LOGO ON COLOR & APPLICATIONS

08 TYPOGRAPHY

01 - LOGO

Primary Logo

The full lockup - mark, wordmark and "Restoration" descriptor stacked vertically - is the brand's primary signature. A stylized archway silhouette, built from a diagonal plank pattern in a warm gold gradient, sits above a classic serif wordmark and a tracked sans-serif descriptor. Use this version whenever space allows: business cards, signage, proposals, the homepage, official documents and any first introduction to the brand.

Format - Vertical, with descriptor

Use - Primary applications

02 - LOGO

Secondary Logo – Horizontal

The horizontal lockup carries the same three elements - mark, wordmark, descriptor - arranged side by side. Use it wherever the layout is wide and shallow rather than tall: letterheads, email signatures, website headers and navigation bars, vehicle signage, wide banners and PowerPoint title slides.

Format - Horizontal, with descriptor

Use - Wide-format applications

03 - LOGO

Compact Marks

Three condensed lockups drop the "Restoration" descriptor for situations where context already establishes it, or where space is simply too tight for the full signature - social media profiles, app icons, embroidery, packaging, merchandise and small print placements.

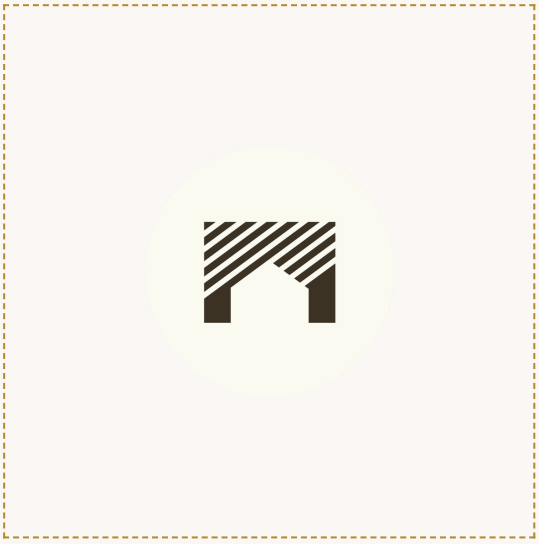

04 - CONSTRUCTION

The Mark, Clear Space & Minimum Size

The archway icon is the brand's standalone symbol - used for favicons, app icons, watermarks and as the building block of the brand pattern (see Section 07). Keep it surrounded by open space so it always reads cleanly.

CLEAR SPACE

Keep a minimum margin equal to the height of one roof stripe (as marked by the dashed guide) free of text, edges and other graphics on every side of the mark.

MINIMUM SIZE

Icon alone - 24px digital / 10mm print.
Full lockup - 120px digital / 25mm print.
Below this, switch to a compact mark.

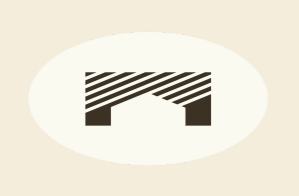

Favicon / App Icon
At browser-tab and app-icon sizes, the roof stripes lose all detail. Use this simplified badge instead of the full icon - solid color, bold silhouette, reads clearly down to 16px.

05 - PROTECTING THE BRAND

Incorrect Usage

The mark stays consistent across every touchpoint. These are the most common ways it gets compromised - avoid them.

Don't stretch or distort the mark

Don't recolor outside the palette

Don't place on low-contrast or clashing backgrounds

Don't add drop shadows, glows or bevels

Don't rotate or tilt the mark

Don't reduce opacity below full strength

06 - COLOR

Color Palette

Gold and charcoal lead the palette; teal and light gold support as secondary accents; the neutral family of warm ivories and soft grays grounds every layout. Gold should read as the hero - used with intention, not as a wall-to-wall wash.

PRIMARY

#B18B2E

Gold

RGB 177, 139, 46
CMYK 30, 42, 100, 6

07 - APPLICATIONS

Logo on Color & Applications

Ready-made variations extend the mark beyond the standard white background.

Reversed - full lockup, for dark backgrounds and photography overlays

Reversed - compact, stacked

Reversed - compact, horizontal

Monochrome - on dark, single-color

Monochrome - on light, single-color

Brand Pattern - packaging, backgrounds, print texture

Typography

WORDMARK - CUSTOM LOGOTYPE ARTWORK

GOLDEN PATIO

The "Golden Patio" wordmark is custom logotype artwork - its letterforms were converted to outlines in the original design file and are not tied to any installed typeface. Never attempt to recreate it by typing in a similar-looking font; always place the supplied logo files (Sections 01-03).

DESCRIPTOR - PROXIMA NOVA

RESTORATION

The "Restoration" descriptor and supporting text is set in Proxima Nova - a clean geometric sans-serif used here in capitals with wide letter-spacing, a quiet counterpoint to the wordmark above it. Shown here in a close visual substitute for on-screen reference.

PROXIMA NOVA IS A LICENSED TYPEFACE (ADOBE FONTS / FONTSPRING / MYFONTS) - CONFIRM AN ACTIVE LICENSE COVERS YOUR INTENDED USE BEFORE PRODUCTION.
